Professional Summary

SQL Developer and ERP Reporting Developer with approximately **two years** of experience in T-SQL development, stored procedure maintenance, and business report delivery using **Crystal Reports** and **RDLC**. Contributed to **requirement gathering, CRM and ERP module customisation**, production support, and bug resolution across Sales, Inventory, and Accounting modules for multiple clients. Pursuing **MCA** at LPU (2026); currently building skills in **Power BI** and **Python**.

Core Competencies

- SQL Server
- T-SQL Development
- Stored Procedures
- CTEs and Views
- Complex Query Writing
- Query Optimisation
- MIS Reporting
- Crystal Reports
- RDLC Reports
- ERP Customisation
- CRM Customisation
- Requirement Gathering
- Production Support & Bug Resolution
- Client Communication
- Sales Module
- Inventory Module
- Accounting Module
- Data Validation
- Report Maintenance
- Business Reporting
- SQL Debugging

Technical Skills

SQL and Database: Microsoft SQL Server, T-SQL, Stored Procedures, CTEs, Views, Subqueries, CASE Expressions, Temporary Tables, UNION, User-Defined Functions, Complex JOINS, OPENJSON, Query Optimisation, SQL Debugging, Database Troubleshooting

Reporting: Crystal Reports, RDLC Reports, KPI Reporting, MIS Reporting, Business Reporting, Microsoft Excel, Dashboard Creation (Internal ERP Tool)

ERP and Business Domain: ERP Customisation, CRM Workflows, Sales Module, Inventory Module, Accounting Module, Requirement Gathering, Client Communication

Programming: JavaScript (Basic), HTML, CSS

Python (Basic): Basic scripting concepts; Pandas (Basic), NumPy (Basic)

Tools and Platforms: Git, GitHub, VS Code, Swagger, Microsoft Excel

Currently Learning: Power BI (DAX, Data Modelling), Power Query, Python for Data Analytics

Work Experience

SQL Developer and Business Reporting Specialist

Surat, Gujarat, India

Ramatek Solution — ERP and CRM software for textile and business management clients

April 2024 – March 2026

- Wrote and maintained **T-SQL** stored procedures, CTEs, views, subqueries, CASE expressions, and User-Defined Functions supporting **MIS reports** and operational dashboards across Finance, Sales, Inventory, and Accounting modules.
- Optimised existing **SQL queries** and stored procedures to improve readability and **reporting efficiency** in production environments.
- Developed **Crystal Reports** and **RDLC** layouts for invoicing, ledger management, and financial KPI reporting across client ERP modules.
- Gathered requirements directly from business clients, translating workflow needs into SQL-based **reporting solutions**.
- Customised **CRM** workflows and **ERP modules**, supporting client deployments from sign-off through go-live and post-deployment handover.
- Debugged stored procedures, report templates, and ERP configurations as part of ongoing **production support and bug resolution**.
- Worked within a small development team across **multiple ERP implementations**, contributing to SQL development and delivery coordination alongside senior developers.

Professional Projects

Developed during employment at Ramatek Solution. Source code is proprietary and client-confidential.

Enterprise ERP Reporting Suite

SQL Server, Crystal Reports, RDLC | Professional — Ramatek Solution

- Built on-demand **MIS and operational reports** covering Sales, Inventory, Purchases, and Accounting modules using **Crystal Reports** and **RDLC**, including invoicing, ledger, and **financial KPI** layouts.
- Structured report datasets using **CTEs**, views, CASE expressions, and temporary tables within stored procedures to ensure consistent output across multi-client deployments.
- Added **inventory KPI** panels and operational metric summaries to the company's internal dashboard tool based on stakeholder requirements.

ERP Implementation and Deployment Support

SQL Server, Angular (Basic), Git | Professional — Ramatek Solution

- Assisted with **multiple ERP client deployments**, supporting SQL reporting setup, module customisation, and post-deployment troubleshooting alongside senior developers.
- Modified SQL queries against existing normalised schemas; applied **OPENJSON** and **UNION** as required by ERP data structures across Sales, Inventory, and Accounting modules.
- Assisted with minor **Angular** (Basic) front-end tasks for ERP screens and contributed to client-facing deployment documentation.

SQL Reporting and Business Reporting

SQL Server, Crystal Reports, RDLC, Excel | Professional — Ramatek Solution

- Maintained SQL stored procedures and **business report templates** for evolving client requirements, including **period-end MIS** and management summaries.
- Performed **data extraction** and validation in SQL Server to verify report accuracy; identified and resolved data inconsistencies before delivery.
- Organised extracted data into structured **Excel dashboards**, allowing non-technical stakeholders to review KPIs independently.

Personal Portfolio Website

HTML, CSS, JavaScript, GitHub Pages | Personal Project

- Built and deployed a personal portfolio website demonstrating front-end skills, live at prithvijaianilkumar-wq.github.io/Portfolio.

Education

Master of Computer Applications (MCA)

Lovely Professional University (LPU)

2024 – 2026 (Expected)

GPA: 7.59 / 10.0 (Current)

Bachelor of Computer Applications (BCA)

Bhagwan Mahavir University (BMU)

2021 – 2024

GPA: 8.58 / 10.0 (Distinction)

Continuous Learning

Currently Studying: Power BI (DAX, Data Modelling, RLS), Power Query, Statistics for Data Analysis, Python for Data Analytics

Focus Areas: Business Intelligence Reporting, MIS Dashboard Development, Data Visualisation, Analytical Reporting

Additional Information

Languages Spoken: English, Hindi, Gujarati, Malayalam

Industry Exposure: Textile ERP Systems, Accounting and Financial Reporting, CRM Workflow Management, Sales and Inventory Operations
